MARINE OPERATIONS

Marine Transportation and Offshore Storage of Oil and Gas

Charter hire of:

- Products Tankers
- Floating Storage Unit ("FSU)/ Floating Storage Operation ("FSO")
- Fast Crew Boats

Port Marine Services

- Towage Service
- Mooring Service
- Dockside Mooring Service

NON-MARINE OPERATIONS

Marine Engineering Services

- Ship Building and Repair

MARINE TRANSPORTATION

Offshore Supply Vessels (OSVs) & Fast Crew Boats (FCB)

OSV/FCB is specifically designed to transport personnel or light cargo efficiently and safely between offshore facilities. These vessels are equipped to carry out:

- Standby and Support Duties
- Emergency Response Plans
- Night Operations

Floating Storage Unit/ Offloading (FSU | FSO)

Offer critical support services for production platforms, including the operation of offshore Oil & Gas storage facilities at brownfield sites.

Offshore Storage of Oil & Gas Product Tankers

These are built to transport refined petroleum products to end-users or other refineries for further processing. They are equipped to handle:

- LPG Vessels (Gas Carrier)
- Clean Petroleum Products
- Diesel & Petrol
- Dirty Petroleum Products

PROVISION OF PORTMARINE SERVICES

Tugboat & Ocean-Going Tugboat

Powered by an extensive network of petrochemical, bulk, and container ports across Malaysia, we deliver reliable, tailored marine solutions to meet operational demands.

Escort Assistance

Escort LNG carriers to and from the PFLNG facility.

Towage Services

Provide towage or positioning support for vessels lacking in maneuverability.

Mooring Services

Securing marine vessels to specially constructed fixtures including handling mooring lines.

Dockside Mooring Services

Securing vessels to floating structures and fixtures at the wharf.

Environmental Monitoring

Providing monitoring and reporting support to assist in maintaining compliance with environmental regulations.

Support for Ship-to-Ship Transfer

Assist LNG carrier operations during ship-to-ship transfer at the PFLNG facility.

MARINE ENGINEERING SERVICES

Our specialty lies in shipbuilding and repair services, including hull construction, machinery installation, equipment integration, painting and thorough testing.

We also offer comprehensive inspection, modification, and maintenance solutions to keep vessels performing at their best.

Where is Avangaad?

Upstream

- Field and production operations (OSV)
- Offshore storage

Midstream

- Transportation
- Port operations

Downstream

- Refining & petrochemical products
- Port operations

Avangaad operates a total fleet of **26 marine vessels**

As of 30 September 2025
