18. PROSPECTS

Despite the prevailing challenges faced by the Group within its economic and operating environment, the Board and Management remain cautiously optimistic in assessing the outlook of the Group.

The Group's current strategy towards a more conservative approach, whereby the aim is to:

- (i) market and monetise our existing "Inventory – Land Held For Sale" first; along with
- (ii) completing the current order book, of which settlements are in cash; as well as
- (iii) adopting the "sell-then-build" strategy for the balance of unreclaimed land, of which settlements are in-kind, wherever possible.

To-date, the revenue yet to be recognised arising from the land reclamation contract secured by the Group, amounting to approximately RM32.70 million, as well as Sale & Purchase Agreements ("Land Sale SPAs") already signed of approximately RM25.15 million, will ensure the Group has total revenue of approximately RM57.85 million to be recognised in the near term. The management has also been actively participating in tendering projects that are viable to bring in more consistent income to the Group and replenish the existing order book.

In addition, the Group also has in excess of 37.06 acres of land bank in Melaka and 41.71 acres in Pulau Indah, Port Klang, already reclaimed and are available for immediate sale. The management has had and will continue to be aggressive with the sales and marketing of our landbank and is prepared to adapt to the requirements of the circumstances where necessary to ensure that some of these land banks can continue to be monetised in the near to medium term.

The Group remains confident in the strong fundamentals of its two (2) main flagship projects in Johor, namely TPMIP and PMIP, which contribute towards both industrial parks being strategic locations within the region, making it well placed to capture various value-added activities within the oil & gas and renewable energy industry.

The management is actively pursuing several leads concurrently, whereby the latest statuses include (a) financial negotiations with the prospective offtakers, (b) buyers are still on-going in their due diligence process to reach financial close, and/or (c) partners are undergoing their project feasibility studies prior to a final investment decision.

The Group, like most other companies within the sector, is adjusting the pace of its operations to ride out the existing uncertainties and slowdown within its operating segment. We endeavour to not stay complacent, and remain vigilant towards the needs of the market, striving to innovate, adapt and create value for our customers whenever possible.
