

INFOMINA STRENGTHENS JAPAN MARKET PRESENCE WITH RM22.1 MILLION PANASONIC DIGITAL CONTRACT

Five-Year Software Subscription and Maintenance Renewal Contract Reinforces Japan's Strategic Importance in Infomina's Regional Growth Plans

KUALA LUMPUR, 12 October 2026 - Regional technology solutions provider **Infomina Berhad** 盈获数码科技集团 (“**Infomina**” or the “**Group**”) is strengthening its presence in Japan following a five-year software subscription and maintenance renewal contract worth approximately **RM22.1 million (JPY855 million)** with **Panasonic Digital Co., Ltd. (“Panasonic Digital”)**, reinforcing the Japanese market's strategic importance in the Group's regional growth ambitions.

The engagement, undertaken through its wholly-owned subsidiary, **Infomina Japan K.K. (“Infomina Japan”)**, further solidifies the Group's position in Japan's enterprise technology sector and underscores its capabilities in supporting mission-critical technology environments.

Infomina Japan had on 12 October 2026 accepted the purchase order and signed the order form with Panasonic Digital for a five-year software subscription and maintenance renewal contract, encompassing the provision of mainframe software subscription licences and support services. Valued at JPY855 million (approximately RM22.1 million), exclusive of consumption tax, the contract will commence on 1 September 2027 and run until 31 August 2032.

Under the agreement, Infomina Japan will be responsible for procuring and administering software licence subscriptions, managing billing arrangements, coordinating support and licence changes, as well as overseeing licence usage reporting and compliance. Its scope of services also includes assessing and monitoring Panasonic Digital's software environment to ensure it remains updated with the latest relevant supported versions.

The five-year renewal further strengthens Infomina's portfolio of enterprise technology engagements in Japan, providing longer-term business visibility while supporting the Group's ambitions to deepen its presence in the Japanese market. The contract is expected to contribute positively to the Group's earnings over the renewal period.

Yee Chee Meng 余志明, Chief Executive Officer cum Managing Director of Infomina Berhad, commented:

“Japan represents a significant growth opportunity for Infomina, and we see considerable potential to further expand our presence in this market. The five-year software subscription and maintenance renewal contract with Panasonic Digital reflects the continued confidence in our capabilities to support mission-critical technology environments, while reinforcing our commitment to strengthening our foothold in Japan.

This contract supports Panasonic enterprise's mission-critical operations by processing massive volumes of data and automating essential analysis, reporting, enabling timely oversight and informed decisions at scale for Panasonic.

Japanese enterprises take great pride in maintaining high standards of quality, reliability and operational excellence, particularly when it comes to their critical technology infrastructure. These values resonate strongly with Infomina's commitment to delivering dependable, long-term technology support. We believe our established expertise in managing mission-critical technology environments provides us with a strong foundation to deepen existing customer relationships while positioning ourselves to pursue new opportunities in the market.

Looking ahead, we view Japan as an increasingly important pillar of Infomina's regional growth strategy. We intend to build on our existing presence, strengthen our capabilities and broaden our engagement with enterprises seeking reliable technology solutions and support.

With the opportunities we see in the Japanese market, we remain optimistic about its potential to contribute meaningfully to the Group's longer-term growth.

Beyond Japan, the Group remains committed to strengthening its regional presence and pursuing opportunities across its established markets, supported by its capabilities in mission-critical infrastructure, cloud, data, artificial intelligence ("AI"), cybersecurity and managed services."
