

# **INFOMINA POSTS 39.6% REVENUE GROWTH TO RM76.2 MILLION IN 1QFY2027**

*PBT Rises 27.3% to RM12.6 Million; New AI Solutions and Data Business Services  
Contributes RM8.4 Million*

**KUALA LUMPUR, 14 October 2026** – Technology solutions provider **Infomina Berhad** 盈获数码科技集团 (“Infomina” or the “Group”) has delivered a strong start to the financial year ending 31 May 2027 (“FY2027”), recording higher revenue and profitability for the first quarter ended 31 August 2026 (“1QFY2027”), supported by stronger contributions from its technology infrastructure operations, maintenance and support services segment.

The Group also made further progress in expanding its regional presence through an enlarged strategic partnership with Broadcom covering 12 Asia Pacific markets and the incorporation of a wholly-owned subsidiary in Australia.

## **1QFY2027 Financial Performance**

The Group recorded revenue of RM76.2 million in 1QFY2027, representing an increase of RM21.6 million or 39.6% from RM54.6 million in the preceding corresponding quarter. The improvement was primarily driven by higher revenue contributions from the technology infrastructure operations, maintenance and support services segment, which grew by 32.8% to RM58.3 million from RM43.9 million previously.

Notably, the Group's newly reported AI solutions and data business services segment contributed RM8.4 million in 1QFY2027, accounting for approximately 11.0% of total Group revenue. The meaningful contribution reflects encouraging progress in Infomina's efforts to diversify its revenue streams beyond its traditional technology infrastructure business, positioning the segment as an emerging growth driver for the Group.

Correspondingly, profit before tax (“PBT”) increased by 27.3% to RM12.6 million, compared with RM9.9 million in 1QFY2026, mainly attributable to higher profit contributions from the technology infrastructure operations, maintenance and support services segment. Profit attributable to owners of the Company (“PATMI”) rose by 30.9% to RM10.6 million from RM8.1 million previously. The Group recorded a gross profit margin of 26.4% in the quarter under review.

## **Financial Position**

Infomina maintained a healthy financial position as at 31 August 2026, with deposits, cash and bank balances of RM85.9 million and total borrowings of RM22.7 million, resulting in a net cash position of approximately RM63.2 million. The Group's total equity stood at RM163.0 million.

### **Outstanding Orderbook Strengthens Earnings Visibility**

Infomina continued to build encouraging momentum with a series of contract wins and renewals across Malaysia and Japan, further strengthening its portfolio of long-term technology infrastructure, software subscription and maintenance engagements.

On 24 September 2026, the Group secured a RM62.6 million contract from a financial institution in Malaysia for the provision of technology refresh supply and maintenance services. The 69-month contract, commencing on 1 October 2026 and ending on 30 June 2032, encompasses the supply and implementation of hardware and software, together with ongoing support and maintenance services.

Subsequently, on 12 October 2026, Infomina Japan K.K., a wholly-owned subsidiary of the Group, secured a five-year software subscription and maintenance renewal contract worth approximately RM22.1 million (JPY855 million) from Panasonic Digital Co., Ltd. The contract, running from 1 September 2027 to 31 August 2032, covers mainframe software subscription licences and support services, reinforcing the Group's growing presence in Japan.

### **Broadcom Partnership and Australian Subsidiary Strengthen Regional Expansion**

Infomina further strengthened its strategic partnership with Broadcom following its appointment on 30 September 2026 to distribute and support Broadcom's Mainframe Software portfolio across 12 Asia Pacific markets. The appointment expands the Group's reach beyond its eight existing markets into four new markets, namely Australia, New Zealand, South Korea and India.

Complementing this expansion, Infomina incorporated **Infomina Pty Ltd ("Infomina Australia")**, a wholly-owned subsidiary, on 29 September 2026 as part of its regional growth strategy. The new entity will provide technology hardware, software, consultancy, support and related services, establishing a direct platform to develop customer and partner relationships in Australia and New Zealand.

**Yee Chee Meng** 余志明, Chief Executive Officer cum Managing Director of Infomina Berhad, said:

*"We are encouraged by the strong start to FY2027, with revenue growing by nearly 40% and PBT increasing by approximately 27% in the first quarter. While our core technology infrastructure operations, maintenance and support services business continues to deliver solid performance, we are particularly pleased with the contribution from our new AI solutions and data business services segment. The segment contributed RM8.4 million, or approximately 11% of Group revenue. This marks meaningful progress in our business expansion plans, and we expect the segment to become an increasingly important growth driver for Infomina."*

*We are equally encouraged by the momentum in securing new contracts and renewals, totalling approximately RM84.7 million across Malaysia and Japan in recent weeks. These*

*back-to-back engagements reflect sustained demand for our technology solutions and services, while further strengthening our recurring revenue base and earnings visibility.*

*Beyond our core business, the expansion of our strategic partnership with Broadcom across 12 Asia Pacific markets significantly broadens our market reach, opening up opportunities in Australia, New Zealand, South Korea and India. The incorporation of Infomina Australia further supports our regional expansion by providing a direct platform to develop customer and partner relationships in the region.*

*Looking ahead, we remain focused on growing our established core business while accelerating the development of our AI solutions and data business segment. Together with our growing orderbook, expanded regional presence and broader technology capabilities, we believe Infomina is well-positioned to capture new opportunities and drive its next phase of growth.”*

.....

## **ABOUT INFOMINA BERHAD**

Infomina Berhad (“Infomina” or the “Group”) is a regional technology solutions provider delivering enterprise technology applications, infrastructure and services that support customers’ core business operations. Its capabilities span the design, implementation, operation, maintenance and support of technology environments across the enterprise.

Headquartered in Malaysia, the Group has an established presence across nine markets in Asia Pacific, namely Malaysia, Singapore, Thailand, the Philippines, Indonesia, Hong Kong, China, Taiwan and Japan. Infomina has further expanded its regional reach into four additional markets, namely Australia, New Zealand, South Korea and India, through its expanded strategic partnership with Broadcom. The Group has also established a wholly-owned subsidiary in Australia to support its regional expansion. Infomina has established expertise in mission-critical infrastructure and mainframe technologies, alongside growing capabilities in cloud, data, artificial intelligence, cybersecurity and managed services.

As part of its long-term growth strategy, the Group continues to broaden its technology portfolio through subsidiaries including Infomina AI Sdn Bhd and Infomina Geolytik Sdn Bhd, which focus on AI-enabled solutions, analytics, digital platforms and industry-specific applications. Its proprietary platforms, including PaymentXchange, ValuationXchange, AiMod and AiExe, support digital transactions, property intelligence, automation and decision-making across enterprise environments.

Infomina also contributes to Malaysia’s digital ecosystem through its long-standing collaboration with Suruhanjaya Syarikat Malaysia (“SSM”), including the operation of the SSM Search Portal ([www.ssmsearch.com](http://www.ssmsearch.com)) and enterprise data connectivity services.

Building on its established technology capabilities and partnerships, the Group continues to expand its enterprise technology portfolio and regional presence, combining proven expertise with emerging technologies to help customers enhance operational resilience, modernise technology environments and pursue digital transformation.
