## 3. Current year prospects

The Group is mindful of the challenges ahead within the engineering and construction industries, which are experiencing intense competition due to reduction of public spending projects under existing fiscal policies, while absorbing price inflation over most engineering materials and equipment.

Notwithstanding, the Group continues to deliver projects on time and successfully completed all its projects. The Group demonstrated resilience in its pursuit of growth under its engineering core business, particularly in the Building Management System and Extra Low Voltage segmentations. Expected replenishment of our order book and an orderly build-up in contractual projects for the next financial year.

We will remain vigilant and continue adopting prudent financial management, improve the competitiveness, implementing cost optimisation initiatives and enhance the operational efficiencies. We remain positive in near term prospect and continue with our transformation journey.
