

# Malaysian Resources Corporation Berhad

(1651 | MRC MK) Main | Construction

**Maintain BUY**

**Cautiously aggressive**

**Unchanged Target Price: RM0.44**

## KEY INVESTMENT HIGHLIGHTS

- **1HFY22 earnings improved to RM28.1m, from loss of RM27.2m in 1HFY21**
- **The results were below our expectation but above consensus**
- **Higher progress billings expected with several projects nearing completion**
- **Management to tender for all three MRT3 packages and LRT3 may see RM1b of extended job scopes**
- **Maintain BUY with unchanged TP of RM0.44**

**Below our expectation.** Malaysian Resources Corporation Berhad (MRCB) registered a normalised PATAMI of RM14.1m in 2QFY22, a significant improvement over the losses of RM32.4m in 2QFY21. For the 1HFY22, the group's normalised PATAMI was RM28.1m, which was below our expectations, making up 37.2% of our full year estimates but coming in above consensus expectations, making up 58.6% of full year estimates.

**Engineering and construction division leads again.** Revenue from the division for 1HFY22 was RM1.15b, making up 76% of the group's total revenue, bringing the segment's profit to RM55.7m, improving from a loss of -RM33m in 1HFY21. On top of the normalisation of operations, the stronger results came from the consolidation of results of Setia Utama LRT3 Sdn Bhd, which was fully acquired by MRCB last year. The project has reached a physical construction progress of 74% and a financial progress of 67% as of June-22. Other contributions came from the ongoing progress of Menara KWSP in Kwasa Damansara, Damansara-Shah Alam Elevated Expressway (DASH), MRT2, SUKE and the PR1MA Brickfields project.

**Cancellation of sales.** The property development and investment division recorded a +20.7%yoy growth in revenue to RM331.9m while the segment's profit grew 2.6 times to RM43.2m, attributable to higher construction progress of its development projects. Management highlighted that there were sales cancellations to the tune of RM30m in 2QFY22, as compared to about RM4m in 1QFY22. This has since been replaced but it has yet to be recognised in MRCB's books, pending the stamping of sales and purchase agreements. Management foresees potential challenges due to inflation and rising interest rates and will be more cautious on new launches. Their focus now is to monetise its inventory of unsold completed stock, which stood at RM349m in June'22. The division currently has RM706.7m of unbilled sales which will be recognised progressively.

**Order book remains strong.** MRCB's unbilled external order book stood at RM18.42b as of June-22, the bulk made up of 46% of infrastructure projects and 46% of transit-oriented development (TOD)

projects. In terms of the ongoing LRT3 project, management said it is in talks with Prasarana which intends to extend the scope of works, which would likely be to reinstate five stations that were previously omitted, on top additional bus terminals and light rail vehicles (LRV) to cater for the additional stations. This could range over RM1bil worth of works, as per management guidance.

**Tendering for all MRT3 packages.** MRCB will be submitting tenders for all three MRT3 packages. It is going in alone for CMC301 and CMC302, while CMC303 will see it going in with a partner, due to the tunneling requirement of the package. Note that any entity or JV/consortium are permitted to take on only one package, should they be successful. Management is still keeping mum on its partner of choice for the tunneling package.

**Raw material and labour concerns.** Even as raw material prices have eased off their peaks, management is still adopting a cautious stance as it expects prices to still remain volatile. As for labour, it remains a concern for MRCB as quite a number of its projects are nearing completion, such as the MRT2 and DASH packages it is working on and LRT3, most of the civil works of which were done. Management guided that productivity levels, especially for LRT3, were lower in 2QFY22 due to shortage of workers, leading to a slowdown in construction progress and lower revenue recognition. We foresee that this would only be a short-term pain that would improve moving forward, with the Government allowing three sectors including construction to hire from 15 source countries.

**Earnings estimates.** We are making no changes to our earnings estimates.

**Target price.** We are maintaining our **TP to RM0.44**, which we derive by pegging the group's FY23 EPS of 1.5 to a target PER of 29.4x, which is -0.5 SD below its five-year mean.

**Maintain BUY.** We remain positive on MRCB, as we expect to see it receiving higher progress billings with several projects almost reaching completion stage. Its current outstanding order book of RM18.42b also ensures a steady pipeline of projects over the long run and this will be bolstered when the Government starts rolling out large infrastructure projects. Management is also aggressive on monetising unsold property units, to raise cash levels. Coupled with a healthy net gearing of about 29.7%, this places MRCB in a good position to take on infrastructure projects with private finance initiative (PFI). We maintain our **BUY** recommendation on MRCB.
