## Operating Profit and Expenses

2007 was an exceptional year with record turnover for the stock broking industry and the Group. Market volume in Singapore and the region began to slow in $4^{\text {th }}$ quarter 2007 and continued into $1^{\text {st }}$ quarter 2008. In tandem with the general decline in trading volume and lower commission income, the Group recorded revenue of $\$ 134.1$ million (2007: $\$ 172.1$ million) and a profit after tax of $\$ 43.5$ million in $1^{\text {st }}$ quarter 2008; a decline of $29.2 \%$ from $\$ 61.4$ million achieved in $1^{\text {st }}$ quarter 2007.

The lower commission income of $\$ 105.1$ million (2007: $\$ 172.1$ million) was partially offset by higher interest income of $\$ 22.2$ million (2007: $\$ 18.6$ million), due mainly to a larger margin portfolio. As with lower commission income, commission expenses also decreased, from $\$ 35.4$ million in $1^{\text {st }}$ quarter 2007 to $\$ 24.3$ million in $1^{\text {st }}$ quarter 2008. The reduction in Finance expense is due to lower working capital requirements.

## Balance Sheet

The Group maintained a strong financial position as at 31 March 2008 with a net asset value of $\$ 996.0$ million. Funding requirements reduced substantially due to lower loans advanced to support trading and IPO activities in Singapore and Hong Kong.

9 Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10 A commentary at the date of the announcement of the competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The first quarter of 2008 was challenging for the financial markets. Market and trading conditions were volatile during this period due mainly to concerns over the impact of the sub-prime mortgage on financial institutions, the effects of the credit crunch on consumer spending and longer term economic growth prospects. Market turnover in Singapore was lower compared to the same period in 2007.

Barring any significant deterioration in market sentiments, the Group expects to remain profitable for the current year.
