#### **B3. Current Year Prospects**

The recently released USA inflation data reveals signs of a broad slowdown, raising hopes that the Fed is concluding its rate hikes, which could positively bode the recovery of consumer-spending-driven economy. However, the ongoing wars in Gaza and Ukraine, coupled with the geographical tensions, raise concerns about economic uncertainties and present challenges for the Group. To navigate these uncertainties and challenges, our Group will actively pursue various cost control measures, strive to improve production efficiency, and explore new market opportunities. Despite those challenges, we maintain a cautious optimism regarding the Group's outlook for the financial year ending 31 December 2023, barring any unforeseen circumstances.
