SunCon's 2Q Profit Surges 120% To RM83 Million, As DC Jobs Accelerate

By Editor August 21, 2025

Sunway Construction Group Berhad announced its financial results for the second quarter ended 30 June 2025 delivering a remarkable 127% surge in revenue to RM1,476.9 million in Q2 FY2025, compared to RM651.2 million in the corresponding quarter in the previous year.

Profit before tax soared 144% to RM122.6 million in the current quarter while profit after tax came in at RM83 million a massive jump from RM38 million recorded in the previous year's quarter.

The remarkable earnings growth was fueled by the strong performance of its construction segment. The construction segment recorded a 140% increase in revenue to RM1,433.5 million, with PBT surging 159% to RM121.4 million. The growth was driven by the accelerated progress of several data centre projects during the quarter, which also contributed to a stronger PBT margin.

For the first half of FY2025, Sunway Construction more than doubled its revenue to RM2,877.4 million, compared to RM1,256.0 million in the corresponding period last year. PBT leapt 157% to RM235.8 million, from RM91.9 million previously. The stellar financial performance was underpinned by peak construction progress in several data centre projects, reinforcing the Group's earnings visibility. The Group declared a second interim single-tier dividend of 7.25 sen per ordinary share for the financial year ending 31 December 2025. Together with the earlier first interim dividend of 5.00 sen per ordinary share, the total dividend declared to date amounts to 12.25 sen per ordinary share.

As at June 2025, the Group's outstanding order book stood at RM6.72 billion, with new orders secured amounting to RM3.81 billion, achieving over 60% of the Group's order book replenishment target range of RM4.5 billion to RM6.0 billion. These contracts encompass a diverse array of projects, including data centres, transit-oriented development and prefabricated components.
