Sunway Bhd (SWB MK)

1Q15 results: Construction key driver; property in line

Sunway's construction arm, which is slated for listing by Jul-15, was the key driver behind the 21% Y/Y rise in 1Q15 core income. Property investment profits were stable, while the property development segment had a slow start, within expectations, due to a lack of new launches (in line with the industry, arising from pre-GST uncertainties). Value-unlocking and cash proceeds from the listing of the construction arm are estimated to translate into dividend yields of about 10% for FY15E, while the prospects for more aggressive landbanking in the Klang Valley are a potential longer-term catalyst, in our view. Sunway remains one of our top picks among developers. We are also OW on Eco World.

- 1Q15 core net profit was up 21%Y/Y, to M\$133MM, representing 23% of our full-year forecast and consensus. This is after excluding one-off items, namely, gains of M\$23MM from the disposal of Sunway Hotel Georgetown and Wisma Sunway and a forex exchange loss of M\$6MM.
- The construction segment was the key growth driver. Construction operating profit rose 70% Y/Y, to M\$53MM (31% of the group total in 1Q15), driven by a 5% rise in revenue due to higher progress billings and revenue from the pre-cast concrete division, as well as a 5.5ppt rise in operating margin, to 14.1%, helped by higher local building projects. The total orderbook stood at M\$2.8B for the division (1.6x historical revenue). To recap, the IPO of the construction arm is slated for Jul-15, after which Sunway's stake will decline from 100% to 51%.
- Slow start for property development. 1Q15 property development profits fell 23% Y/Y due to slower progress billings during the quarter. Total new pre-sales fell 13% Y/Y, to M\$247MM, or 12% of our full-year forecast of M\$2.1B (1Q15 domestic pre-sales were M\$208MM, or 13% of our full-year forecast of M\$1.56B). The slow start was due to a lack of new launches during the quarter, in line with the overall industry trend, due to pre-GST uncertainty and caution (GST was implemented in Apr-15). We maintain our pre-sales forecast, as we expect momentum to pick up in coming quarters as launches are stepped up mainly from 2H15 onward. In terms of visibility, unbilled sales of M\$2.5B as of end-1Q15 translate into 2.1x historical property development revenue.
- **Stable contributions from property investment.** Headline property investment profits rose 116% Y/Y, boosted by the gains from asset disposals mentioned above. Stripping this out, the division showed stable Y/Y profits.
- Maintain OW. We like Sunway for its integrated business model with strong investment assets and branding. In the near term, the planned listing of its construction arm by Jul-15 is estimated to translate into a FY15E net dividend yield of about 10% at current levels from special cash dividends and dividends in specie in the listed construction arm. Sunway trades at a 37% discount to RNAV, or at -1SD to the sector's historical mean (sector trough of 44%). Prospects for more aggressive landbanking, especially in the more resilient Klang Valley market, are a potential longer-term catalyst, in our view, helped by the company's healthy balance sheet (net gearing of 32% as of end-1Q15). To recap, the group recently announced the acquisition of a 17-acre parcel in Kelana Jaya, Klang Valley, which will raise its Klang Valley GDV by 16%, to M\$13.1B, with project launch scheduled for sometime in 2016.

Investment Thesis

We believe the outlook for developers remain subdued in the next six to nine months due to weak consumption trends arising from GST costs (introduced in Apr-15) and the weaker Ringgit. While Sunway Bhd has some exposure to Iskandar, Johor, where sales have been more heavily impacted by the 2013 cooling measures and rising competition, we believe it has an edge in terms of location, product concept (landed township) and execution in Iskandar, and that its diversified earnings base will also provide support. We continue to like its long-term fundamentals in view of the following:

- 1. **Strong commercial asset backing:** The group owns prime investment properties via 36%-owned Sunway REIT, with prospects for unlocking value and raising cash here in the next phase of asset injection into its REIT vehicle, which we believe is likely after FY16/17.
- 2. **Diversified earnings base:** Unlike purer developers, property development accounts for a smaller 50% of Sunway Bhd's earnings. In Iskandar, it has started from a zero base (with its maiden launch in Jul-14), so we believe it has more to gain than to lose, as opposed to the existing Iskandar dominant player, UEM. For now, we have more conservatively forecast that the Medini, Iskandar projects will account for no more than 13%/15% of new property sales over FY15/16.
- 3. Construction sector growth: Existing construction orderbook of M\$3.0B as of end-FY14 accounts for 1.8x historical revenue, with the group tendering for additional domestic projects. A higher proportion of domestic construction projects going forward should also contribute to stronger operating margins. The listing of the construction unit by Jul-15 should help unlock value, raise cash and translate into an estimated net dividend yield of 10% for FY15E (including special dividends and dividends in specie from shares in the construction IPO). Sunway Bhd will own 51% of the construction unit post-IPO vs. 100% currently.

Valuation

Our Dec-15 PT of M\$4.30 is based on a 23% discount to RNAV, which is the average of the historical mean and a +1SD discount for the sector. We believe this is fair, given efforts to unlock value from the proposed IPO of the construction arm, and given Sunway's strong fundamentals and rising status as one of the emerging/preferred sector proxies.

Risks to Rating and Price Target

Key downside risks include:

- 1. Slower-than-expected property sales due to weak consumer sentiment following the recent introduction of GST since 1-Apr-15.
- 2. Rising competition in Iskandar, with supply expansion affecting the high-rise, high-density segment in particular. For Sunway, its low-density Medini project in Iskandar accounts for 20% of our base-case RNAV and was launched only in Jul-14, with no significant earnings contribution yet.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.
