18. PROSPECTS FOR NEXT FINANCIAL YEAR

The oil services sector was hardest hit by the Covid 19-induced crash of late 2019. The crash was an additional blow to already tattered industry that seen steady decline since 2015.

As the world is opening up and transitioning to endemic state, the oil prices had steadily increased, helped further by Russia's late February invasion of Ukraine, has prompted reversal of fortunes with highen activities.

Soaring oil and gas prices have dramatically altered the dynamic between oil companies and the OGSE. With oil prices trading over \$100 a barrel and markets facing a supply crunch, the OGSE is looking at a robust, multi-year upcycle as demand surges for the equipment and services to meet the additional production demand.

Consequently, we foresee the utilisation of our services increasing, particularly for our Well Solution Services including wireline services, coil tubing services, pumping and cementing services, hydraulic workover unit for plug and abandonment services, and workover services. Our Production Solution Services remain the same.

In tandem with the above, our other O&G services such as trading, also seen an increasing demand for oilfield chemical solution, domestically and internationally. Further, our petrochemical distribution and logistics reporting maiden sales in the coming quarter, with increasing demand in the industry.

Cautionary : As the industry is highly regulated especially in Malaysia where about 80% of our income is generated, the award of work and execution work will only be felt 1-2 quarters ahead. The tendering and award process takes time.

Non-O&G Segment

We accelerated our efforts to pursue opportunities to diversify and balance our business portfolio beyond the O&G sector, venturing into new key growth areas such as New Energy and, Digitalisation & Technology.

Our renewable energy business is steadily growing. In addition to our 50 megawatt ("MW") Large Scale Solar 4 ("LSS4") Power Purchase Agreement ("PPA"), our associate company, Suria Infiniti Sdn Bhd had been awarded Engineering, Procurement, Construction, Commissioning ("EPCC") work for 29.99 MW LSS4 project. We also secured several Net Energy Metering ("NEM") contracts; both as EPCC and PPA holder.

In December 2021, the Ministry of Energy and Natural Resources of Malaysia (KeTSA) set a target to reach 31% of RE share in the national installed capacity mix by 2025. This target supports Malaysia's global climate commitment is to reduce its economy-wide carbon intensity (against GDP) of 45% in 2030 compared to 2005 level. The Malaysia Renewable Energy Roadmap (MyRER) is commissioned to support further decarbonization of the electricity sector in Malaysia through the 2035 milestone. Under MyRER, new capacity target was launched and we expect this will augur well with our strategy to aggressively grow in New Energy business.

The Board remain cautiously confident to stay resilient facing challenges during these uncertain times, and we believe that our commitment on the execution of our strategic plans will continue to steer our Group towards a sustainable growth.
